

Chameleon Modular Education boards

- Specifications -

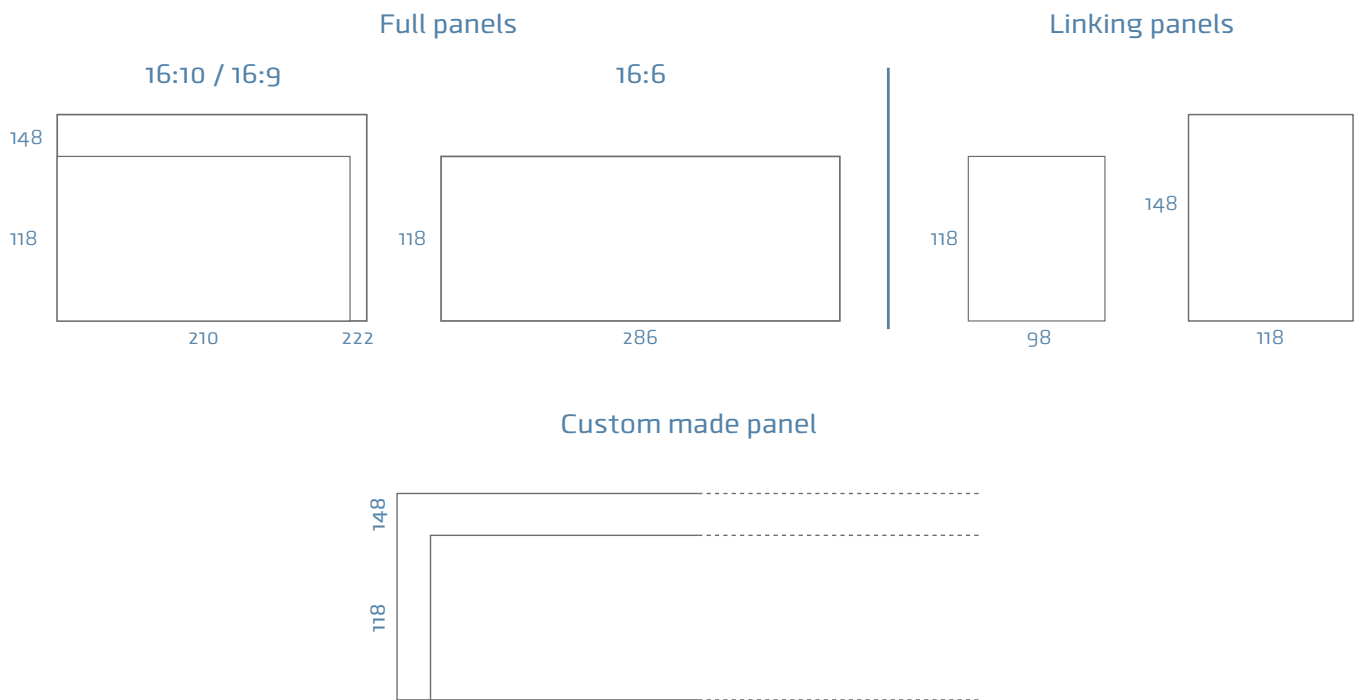

Endless writing and projection surface

Chameleon educational boards are connectable whiteboards finished in white enamelled steel. The boards are exactly the right size for 88-inch 100-inch or 120-inch ultra short throw projection, including space for a touch sensor. Linking panels can be used to vary the width. Customisation is also one of the options so that the whiteboard can fit exactly between 2 walls.

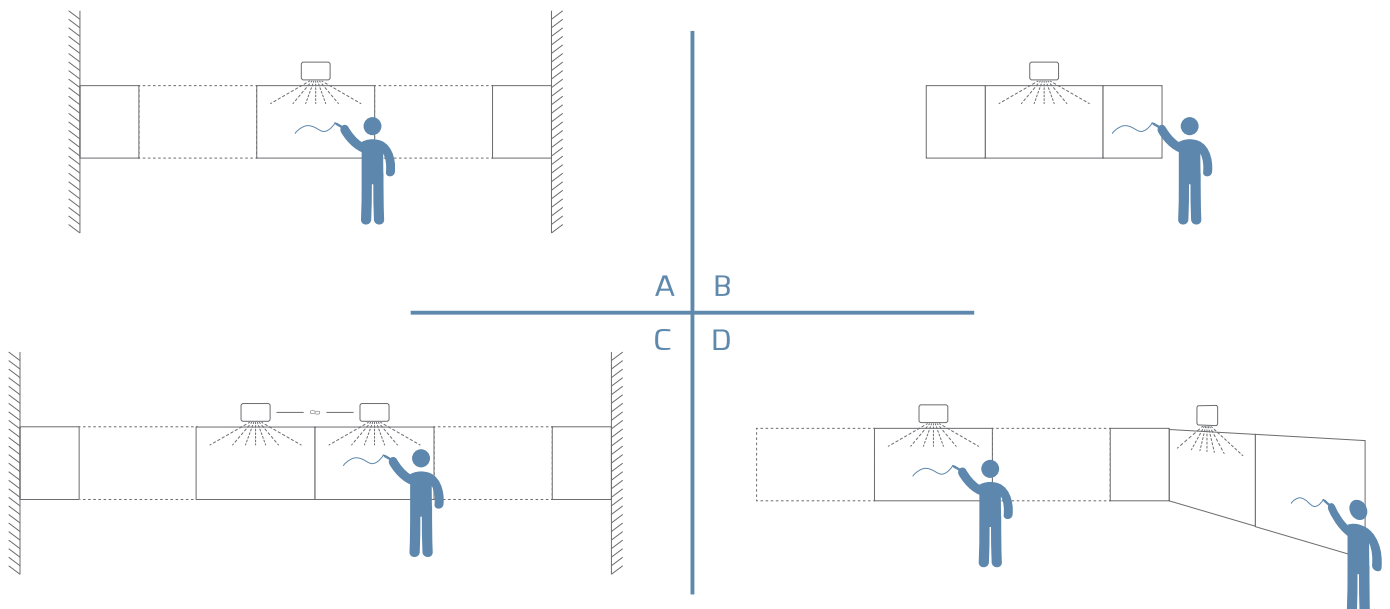

The concept

- Writing and projecting on one single surface
- Modular extendable
- 3 different heights for 88, 100 or 120 inch projection. Space for the touch sensor of the projector is included.
- 3 different widths + custom size
- A surface of white enamel with a lifetime guarantee on writing and erasing. In combination with a short throw projector, annoying hotspots are minimalised.
